

KANDULA LIKHITHA

Software Developer — Python — FastAPI — REST APIs — PostgreSQL — SQL

Mobile: 7095499986 — Email: likhithakandula1511@gmail.com

PROFESSIONAL SUMMARY

Software Developer with 1 year of industry experience at LakkshionsIT, working on backend applications using Python, FastAPI, NestJS, REST APIs, SQL, PostgreSQL, and MySQL. Experienced in developing APIs, authentication, database operations, third-party API integrations, media processing, and asynchronous workflows using Temporal. Worked with Meta Developer APIs, Shotstack, AWS S3, and Cloudinary for application integrations and media workflows. Also have exposure to frontend technologies including HTML and CSS, along with API testing using Postman and Swagger.

PROFESSIONAL EXPERIENCE

LakkshionsIT

July 2025 – September 2026

Software Developer

– Media Operations Automation Tool

- Designed and implemented Post Service APIs to handle content publishing workflows including text, hashtags, mentions, and media attachments.
- Developed REST APIs using Python FastAPI and NestJS for content publishing, media management, social account integration, and backend workflows.
- Worked with Meta Platforms Developer APIs to configure and manage app credentials, access tokens, permissions, and social media publishing workflows.
- Implemented end-to-end workflows for immediate and scheduled content publishing across platforms such as Facebook, Instagram, Twitter, and LinkedIn.
- Implemented Temporal workflows for asynchronous and scheduled publishing logic with retry and failure-handling mechanisms.
- Integrated Shotstack Video Rendering API for dynamic video generation using JSON-based video timeline creation, media overlays, text, audio, and images.
- Optimized API performance using polling short-circuit logic and database caching to reduce unnecessary external API calls.
- Developed media upload pipelines using Cloudinary and AWS S3 for media storage, retrieval, and file management.
- Implemented S3 presigned URL workflows for secure media upload and retrieval.
- Implemented JWT authentication, request validation, error handling, API logging, and Swagger API documentation.
- Tested APIs using Postman and Swagger and participated in debugging and resolving backend API issues.

– HRMS Project

- Developed backend APIs using Python FastAPI, PostgreSQL, MySQL, and SQL for employee onboarding, attendance, leave management, and employee profiles.
- Implemented role-based access control for Admin, HR, Manager, and Employee roles.
- Developed CRUD APIs, business logic, database queries, request validation, and API response handling.
- Implemented validation, exception handling, and standardized API responses.
- Used Git for version control and collaborated with team members during development and debugging activities.

EDUCATION

GVP College of Engineering for Women

September 2022 – March 2025

B.Tech in Electronics and Communication Engineering

CGPA: 8.6

GPTW-BHEEMILI

June 2019 – May 2022

Diploma in Electronics and Communication Engineering

88.24%

Sree Vidya School

June 2018 – March 2019

SSC

CGPA: 10

ACADEMIC PROJECTS

Enhancing Indoor Localization Using Hybrid Deep Learning

Academic Project

- Developed a hybrid deep learning approach combining CNN and LSTM techniques for indoor localization.
- Worked on data processing and model-based prediction for improving indoor positioning accuracy.

Flood Monitoring System

Academic Project

- Developed a flood monitoring system using Arduino and sensors to monitor environmental conditions.
- Worked on sensor integration, data collection, testing, and system monitoring.

Smart Garbage Monitoring System

Academic Project

- Developed a smart garbage monitoring system using Arduino, sensors, and Python.
- Implemented a system to detect garbage-bin fill levels and automatically trigger actions and notifications.
- Designed the system to send information to the server or municipal corporation to help avoid odor and disease caused by overflowing garbage.

TECHNICAL SKILLS

Backend Development: Python, FastAPI, NestJS, REST API Development, API Integration

Frontend Development: HTML, CSS

Databases: MySQL, PostgreSQL, MongoDB

Authentication: JWT, Role-Based Access Control (RBAC)

Third-Party Integrations: Meta Developer APIs, Shotstack API

Cloud & Storage: AWS S3, Cloudinary

Workflow Automation: Temporal

Tools: Git, Postman, Swagger

INTERNSHIPS

- VLSI Signal Processing Internship.
- AI/ML Internship through AICTE.
- 6-month Cisco CCNA Networking Internship/Training.

SCHOLASTIC ACHIEVEMENTS

- Honors in Electronics and Communication Engineering with VLSI specialization.
- Secured 2nd place in poster presentation on the impacts of quantum computing on the metaverse during IEEE Hackathon
